

3864 solution

Very important complementary mix. That goes with any feed that does not contain pellets. During the moulting period and flights mix approx. 1/3 part. During the winter mix approx. 1/5 part. To be used in every flight schedule except the G-spirits schedule.

Available packaging:

18.0 kg	4.0 kg

Product description

Pigeons don't get enough with only mixtures of only corns and seeds. Without supplement they use up their reserves.
3864 Solution is supplementary feed with a concentrated pellet containing all the necessary nutrients. It contributes enormously to the resistance and vitality of pigeons. After about 3 weeks, the effect of this supplement is noticeable in its plumage. This mixture is not used in the g-spirits line.
Supplement the 'normal' pigeon feed, such as the prestige mixtures, with 1/3 part 3864 solution.

Feeding advice

- During the moulting period and flights mix approx. 1/3 part
- During the winter mix approx. 1/5 part
- To be used in every flight schedule except the G-spirits schedule

Composition:

small round corn, barley pigeon, dari red, paddyrice, linseeds, blue peas, safflowerseed, soybeans toasted, hempseed, millet yellow, lentils, mungbeans, oats peeled, peas yellow, soja oil, vetches,
