Complete grain mix with pellets for chicks from 3 weeks until laying.

- **High-quality chick feed**
- **With protein-rich mini pellets**
- **For balanced chick growth**

Available packaging:

20.0 kg

4.0 kg

Product description

Alfamix chicks is a mixture of high-quality, protein-rich mini pellets blended with chick seed and finely cracked peas. Feed Alfamix chicks until the hens start laying (20–26 weeks). The chicks readily and eagerly eat this feed. It supports the development of the whole animal and balanced growth of meat, bones, and organs.

Feeding advice

- suitable for young chickens from 3 weeks up to approximately 5 months old
- feed fresh food daily, no more than the chicks can eat. This prevents selective feeding
- always provide enough gizzard grit
- provide fresh water daily

Questions about this food?
