

5054 ratites pellet (5mm)

complete pellet. For maintenance of adult animals

Available packaging:

20.0 kg

Feeding advice

- make sure there's always enough roughage (grass, hay, greens, bread)
- supplement year-round with 5054 ratites pellet
- give chicks the first 10 weeks 702 fancy chick starter minipellet and then gradually switch over to 5054 ratites pellet
- give about 30% more feed when the animals are abundantly laying eggs or are moulting
- emus digest less feed while laying. It is, therefore, extra important that, besides the concentrate, little or no supplements are given
- make sure there's always fresh water

Composition:

maizemash, alfalfa, wheat, barley, maize gluten feed, soya dehulled extracted toasted, maize, linseed fibers, apple molasses, shell grit, potatoprotein, brewer's yeast, lecithin, lime stones
