

## 803 waterfowl breeder pellet

complete pellet. For all waterfowl which eat on land starting from 8 weeks before brooding

Available packaging:

20.0 kg

### Feeding advice

- about 8 weeks before brooding switch over to 803 waterfowl breeder pellet so that the animals lay enough well-fertilized hatching eggs
- give waterfowl babies / ducklings and goslings from day 1 till about the 12th week 805 waterfowl starter minipellet. This small pellet ensures a uniform development of the whole duckling

### Composition:

barley, soya dehulled extracted toasted, wheat, maizemash, alfalfa, maize, shell grit, maize gluten feed, lime stones, soja oil, rape seed extracted, brewer's yeast, lecithin

### analytical constituents/kg
